## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 10-13 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Koizumi.

3. Koizumi discloses the invention as claimed where: **30** is a base; **22** are elongate measuring members operatively connected to the base; and both mechanical (sensing resistors) and optical sensors are described (see col. 5, ll. 28-54) as being operatively coupled to the elongate measuring members for determining displacement. The sensors described in the specification of Koizumi inherently track the pin movement. Sensing resistors operate by monitoring the change in resistance as a member is

tracked along the length of the resistors. Optical sensors operate by tracking marks along a member as the member is moved relative to the sensor.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 29 is rejected under 35 U.S.C. 103(a) as being unpatentable over Koizumi in view of Philbin.

6. Koizumi discloses the invention substantially as claimed. However, Koizumi does not disclose rollers as claimed. Philbin discloses how rollers may be moved to measure the distance along an object. Therefore, it would have been obvious at the time the invention was made for one of ordinary skill in the art to use rollers as taught by Philbin in combination with the device of Koizumi for the purpose of mechanically measuring distance along the length of the Koizumi measuring members.

***Conclusion***

7. Claims 1, 2, 5-9, 19, 20 and 23-28 allowed.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
